\*Customize Language (right-click tray icon)

Disable Self-Defense (Click the 4 buttons)

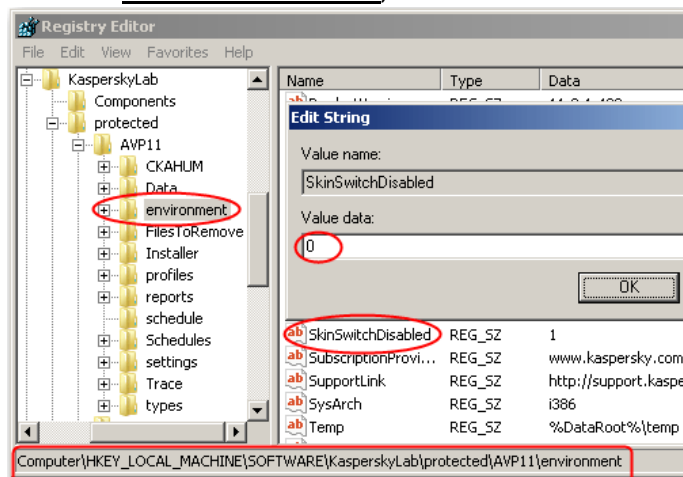

Click: 3<sup>rd</sup> last option

\*If you want to switch to English interface, the first thing you must do is to turn off or disable Kaspersky Self-Defense. You can do that by right clicking on the Kaspersky tray icon at notification area and select the seventh option which will open the Settings window.

Then click on the buttons by following the numbers which will

Goto the REGISTRY and FIND: `HKEY_LOCAL_MACHINE\SOFTWARE\KasperskyLab\protected\AVP11\environment\`

Look for **SkinSwitchDisabled**, double click on it to edit and change the Value data from 1 to 0 and click OK.

Now open Kaspersky program and simultaneously press SHIFT+F12 which will instantly switch the interface to English edition.

NB: Please use caution when dealing with the Registry; we are not liable for any losses as a result of this activity. This guide is based on a similar article published by RCCB.
