

Customize Trend Micro Titanium Internet Security 2011 UI Language

1. Download, extract and run the executable to install. The installation would be in Chinese, so simply follow the step-by-step instruction based on the screenshot below.

2. Right click on the Trend Micro Titanium Internet Security 2011 tray icon at the notification area and select the last option to terminate the program.
3. Now go to C:\Program Files\Trend Micro\UniClient\UiFrmwrk\ and open UIProfile.cfg file with your text editor such as Notepad.
4. At line 75 and 85 which shows ZH-CN, change both of it to EN-US and save the changes.

5. Now run Trend Micro Titanium Internet Security 2011 shortcut either from desktop or Start Menu.
